PROFILE

A graduate student of Information Systems at Brawijaya University with a passion in **web application development**. Deeply interested in **full-stack development** with **1.5 year experience** in specialization of **frontend engineering**. I have contributed to several companies across various industries, including **software houses** and **fintech**. Passionate about crafting and managing reusable modules to enhance both developer and user experience.

EDUCATION

Universitas Brawijaya – Malang, Indonesia <i>Faculty of Computer Science, Information Systems Major</i>	<i>Aug 2021 – Jan 2025 (3.5 years)</i>
---	--

- **GPA:** 3.88/4.00 (146 Credits)
- **Relevant Courses:** Web Development, Data Structures and Algorithm, Database Programming, Database Administration, Analysis and Design Information Systems, Reuse Oriented Development.

WORK EXPERIENCE

PT Pakar Digital Global (Paper.id) Frontend Engineer Platform, Internship	Jakarta, Indonesia <i>Jan 2025 - Present</i>
--	--

- Refactored and improved 20+ features of product that was developed both by MLE (medium-large enterprise) team and SMB (small-medium business) team using **Angular**
- Developed 3 features for reporting each transaction and disbursement in the Pay-In page.
- Re-write business-industries data, integrate 3 services using API service and sync other components.
- Successfully achieved target 5+ task on each sprint of 2 week sprints

PT Sekawan Media Informatika Frontend Developer, Internship	Malang, Indonesia <i>Jul 2024 - Nov 2024</i>
--	--

- Architected the project's framework and established coding standards with the tech lead, ensuring a unified development approach for a team of 8 engineers, resulting in 20% fewer merge conflicts.
- Sliced **8** UI pages from **Figma** into a web application using **React.js**, with **Next.js** including admin role page, manage users, manage modules, manage programs, and portal web.
- Improved the **Next.js** **SEO** and **Google Lighthouse** score from **80%** overall score into **90+** overall score using **Next Analyzer** as analytic tools for both the landing page and back-office.
- Optimized **data-fetching** methods in the application by leveraging the **TanStack** library to manage application and data state, reducing redundant network requests by up to **60%**

PT Suitmedia Kreasi Indonesia Frontend Developer, Internship	Jakarta, Indonesia <i>Feb 2024 - June 2024</i>
---	--

- Engineered 1 web application (application belonging to Indonesian religious institutions) from start to finish, including slicing, integration, and initial testing (feature improvements or bug fixing).
- Sliced the 5 pages from **Figma** and integrated it into the web application using **Vue.js** with the **Nuxt.js** framework.
- Built reusable **20+** UI components for a consistent workflow, either in a global module or specific to each functionality (domain).
- Integrated API services from the backend **Laravel** with **20+** endpoints, including authentication and authorization.

PT Digdaya Olah Teknologi Indonesia (DOT Indonesia) Frontend Engineer, Internship	Malang, Indonesia <i>Oct 2023 - January 2024</i>
--	--

- Managed and implemented feature improvements for 3 applications (products) during a 3 month internship.

- Contributed to 45+ feature improvements and bug fixes across internal applications for DOT Indonesia, PT Triputra Energi Megatra (TEM), and ITS MyResearch within 1 month using **Laravel, React.js, Inertia.js, Nest.js, and jQuery**.
- Worked with scrum - agile development method with a development team consisting of 4- 6 members.

FILKOM UB LABORATORY OF COMPUTER SCIENCE

Malang , Indonesia

Database Administration Teaching Assistant, FILKOM UB

Aug 2023 - Des 2023

- Taught and assisted 42 information technology major students in a database administration practicum course, with **90%** of them acquiring an A grade.
- Delivered **100%** curriculum consisting of HADR (High Availability Disaster Recovery), database migration, database backup and recovery, database security, and advanced database objects.

AWARDS

HIMATEKKOM UB

Malang, Indonesia

2nd Place IoT IDE-LITE 2022

Nov 2022

- Created the concept of a smart office with an integrated IoT system, including a Smart Chair.

SKILLS

Soft Skills: Communication, Teamwork, Problem Solving, Management, Logical Thinking, Attention to Details.

Hard Skills: HTML, CSS, JavaScript, JQuery, Tailwind CSS, React, Next.js, Vue.js, Nuxt, Angular, Node.js, Laravel, Nest.js, Figma.

Field of Interests: Fullstack Web Development, Progressive Web Apps (PWA) Technology, Microservices, Web Application Optimization.

CERTIFICATION AND TRAINING

Certification & Training: HTML & CSS [Progate], Java Basic [Hackerrank], SQL Basic [Hackerrank], React Basic [Hackerrank], Node Js - The Complete Guide (MVC, REST APIs, GraphQL, Deno) [Udemy], Python Basic [Udemy]
